I support XM Radio!! I oppose HR 4026 and think the FCC should reject NAB's petition 04-160. We pay a monthly fee for XM radio and we should be able to get the programming that we want. I use XM radio to receive weather and traffic updates on a daily basis because it is the only place where I can get this information 24 hours a day, 365 days a year since I am on over the road truck driver. I don't have time to stop at truckstops to find a weather channel several times a day to get all this information. XM Radio is wonderful and I think it should have every right to offer everything it does!!
